ABOUT CHINT

CHINT A leading global provider of smart energy solutions

Founded in 1984, CHINT is a leading global provider of smart energy solutions. It is actively deploying “4+1” industrial sectors including smart electrics, green energy, industrial control and automation, smart home and incubator, forming an integrated whole industry chain of “power generation, storage, transmission, substation, distribution, sales and consumption”. And it boasts an extensive business network across over 140 countries and regions as well as more than 30,000 employees and an annual sales revenue of over USD 11.4 billion. CHINT has been ranking among China’s Top 500 companies for 18 consecutive years. Its subsidiary, CHINT Electrics is the first company in China with low-voltage electrics as its main business getting listed on the A-share market as one of the Top 50 Asian listed companies.

To comply with the trend of integrated development of modern energy, intelligent manufacturing and digital technology, CHINT has adopted “One Cloud & Two Nets” as the business strategy. CHINT Cloud fulfills digital application and services in both

internal and external as the platform of intelligent technology and data application. Based on the Industrial Internet of Things (IIoT), CHINT built an intelligent manufacturing system and realizes intelligent application in electrical industry. Relying on the Energy Internet of Things (EIoT), CHINT built its smart energy system and develops the regional EIoT mode.

Focusing on energy system of supply, storage, transmission, distribution and consumption, CHINT has core businesses of clean energy, energy distribution, big data and energy value-added services. Furthermore, CHINT pillar businesses include photovoltaic equipment, energy storage, power transmission & distribution, low-voltage apparatuses, intelligent terminals, software development and control automation. With developing into a platform-based enterprise, CHINT provides a package of energy solutions for public institutions, industrial & commercial users and end users, by building a regional smart energy operation ecosystem.

ONE CLOUD & TWO NETS STRATEGY

Energy system optimization is an inevitable trend against the background of resource shortage, environmental pollution and climate change – three challenges faced by global energy development. To keep in line with the trend, CHINT actively implements the business strategy of One Cloud & Two Nets, continuously promotes the deep integration of big data, IoT, AI and manufacturing industry in stages to become a platform-based enterprise, and leads the new direction of industry development.

As a medium of smart technology and data applications, CHINT Cloud connects corporate in-house manufacturing with operation and management data, realizing digital applications and services both internally and externally.

As a user-centric multi-energy complementary smart energy system, CHINT EIoT provides a package of energy solutions for governments, industrial & commercial users and end users. Its business includes Smart Energy Efficiency, Smart Power, Smart Home and Smart Clean Energy, etc.

As a smart manufacturing system based on corporate digital transformation, CHINT IIoT constitutes a flexible, high-efficiency and intelligent industrial system. Its business includes Intelligent Manufacturing, Intelligent Industry, Smart Water, Smart Heating, etc.

DDSU666 Single Phase Smart Meter

Feature

- Multi-measurement: kWh, W, V, A, PF, Hz, etc.
- RS485 ModBus communication
- Standard DIN35mm mounting

Specification

Item	Parameter	
Measurement	Connection Type	1P2W
	Accuracy	Direct: Class B/ 1.0 CT: Class C/ 0.5S
Voltage	Nominal Voltage(Un)	220V...240V
	Operating Range	0.85Un~1.15Un
Current	Direct: 0.25~5(80)A CT: 0.015~1.5(6)A	
Frequency	50Hz or 60Hz	
Display	LCD with backlit	
LED Indication	Pluse Output	
Measured Values	Import&Export kWh

Feature

- Real-time measurement and indication for the current and voltage Value of the circuit
- Extensible relay digital output function
- RS485,support Modbus-RTU, and baud rate setting.

Specification

Items	Parameter
Voltage	AC 450V
Current	AC 5A
Frequency	45Hz~65Hz
Accuracy	Class 0.5
Auxiliary Power Supply	220VAC ± 20%,AC/DC85~264V
Operation Temperature	Operation Temperature: -10℃ ~+45℃ Storage Temperature: -25℃ ~ +70℃
Display	LED

PD7777-3H Harmonic Multi-function Power Meter

Feature

- 3.5-inch color LCD display
- Real-time measurement and indication for the current and voltage Value of the Circuit
- Measure the 2nd~31st harmonic content of the voltage, current and total harmonic distortion
- Display the last ten records of switch Inputs SOE, and the last ten records of relay outputs SOE
- RS485, support Modbus-RTU and baud rate setting
