

### ⚠ Safety Warning

- 1 Please confirm the power before wiring terminal and terminal load position. If the wiring error the internal contact melting.
- 2 Dial is absolutely irreversible (according to the direction of the arrow, the direction of rotation is absolutely irreversible).
- 3 Motor load more than 750W (110V), 1500W (220V) must be used with the electromagnetic switch.

### 1 CONNECTION EXAMPLE

Figure 1

01

### 2 OPERATING INSTRUCTIONS

Before turning power ON, check that your unit conforms to the operating voltage.

When you buy this product, the inside battery for a long discharge itself, the power reserve will lower. When the inside battery completely discharge, even if connect and switch on the power source, the product still not working immediately. Then please connect and switch on the power source, and wait about 10 minutes before set the product present time. The full power reserve is built up after about 100 hours.

#### 2.1 Set the operating time:

Set the setting pin between the desired times to the left or right of the Dial.

Set the setting pin to the right of dial: ON-state is reached at that time, if the setting pin is set to the right continuously, ON-state continues only for NO. of setting pins X 15 minutes.

Set the setting pin to the right fully until a click is heard.

If the setting pin is set to the left, at that time, the output is placed in OFF-state.

Set the setting pin as shown on the above; the time chart is as right:

Figure 2

02

- 2.2 Adjust the present time:  
Turn the dial till the index is on the current time (Present time).
- 2.3 Set the manual switch:

Figure 2

\*Auto\* Output is turned ON and OFF according to the set program. Manual \*ON\* Output is turned ON irrespective of the program. (permanent ON)

Use this mode for test operation.

After completion of test operation, set the manual switch to \*AUTO\*.

### 3 SPECIFICATIONS

Table 1	
Rated voltage	110VAC, 220VAC
Voltage tolerance	95~121VAC, 200~240VAC
Frequency	50Hz/60Hz (common use)
Drive method	Quartz controlled stepping motor
Time precision	±2Sec/day at 22°C
Cycle	24 hours
Power consumption	1W
Working reserve time	100 Hours
Circuit	Separate circuit (voltage is not applied to the load circuit)
Switch construction	SPST
Auto ON/OFF	ON/AUTO switch
Resistive load	16A
Incandescent lamp	1000W
Inductive (COSφ=0.6)	4A
Energy saving lamps	150W

03

Continued Table 1

Setting	ON/OFF program setting	15 Minutes
	Minimum null	15 Minutes
	Minimum interval	15 Minutes
	No. of ON/OFF operations	96 operations
	Ambient temperature	-10 ~ +50°C
	Ambient humidity	Max. 85%
	Weight	70g
