

## For Immediate Release

# CHINT Electric France Demonstrates its Solutions for- Innovation and Decarbonization at the Heart of EnerGaia 2024

**Paris, December 10, 2024** – CHINT Electric, a global leader in intelligent energy solutions, reaffirms its commitment to energy transition by participating in the EnerGaia trade show in Montpellier on December 11 and 12, 2024.

EnerGaia is a crucial meetup for renewable energy professionals. In 2023, the event attracted over 17,000 participants and 450 exhibitors.

**CHINT's** strategic vision is to achieve carbon neutrality by 2050 by developing technologies that accelerate the global energy transition. The company will showcase some of these innovative solutions at Hall B3 Stand SB76. These include:

### Technological Innovations highlights:

- **750 kV Ester Oil Power Transformer:** This is the world's first sustainable energy infrastructure, symbolizing CHINT's commitment to energy efficiency.
- **Intelligent NB2 Circuit Breakers:** These circuit breakers redefine modern electrical technology by combining safety, efficiency, and remote management.
- **Integrated Photovoltaic Solutions:** These high-performance solutions, including energy stations and OEM EV chargers, address current energy challenges.
- **Industrial and Commercial Solar Storage:** Optimized solutions to ensure the reliability and performance of modern energy systems.

### **Franck Mazzolini, T&D Commercial Director, CHINT Electric France:**

*"Our 750 kV Ester Oil Transformer represents the future of sustainable energy infrastructure. Discussing this significant innovation at EnerGaia 2024 underscores our commitment to delivering concrete solutions for an efficient and environmentally friendly energy transition. This event is an ideal platform to share our expertise and engage with leaders in renewable energy."*

### **Thomas Lepers, Low Voltage Commercial Director, CHINT Electric France:**

*"Through solutions like our NB2 smart circuit breakers and integrated photovoltaic systems, CHINT Electric is redefining energy management to address today's challenges. For us, EnerGaia 2024 is an opportunity to demonstrate how our technologies make energy safer, smarter, and more sustainable. Together, let's work towards a responsible energy future."*

Let's realize carbon neutrality through cutting-edge innovations and a shared commitment.

Don't miss the opportunity to meet our experts and discover how CHINT Electric shapes tomorrow's energy solutions at Hall B3 Stand SB76.

CHINT develops solutions ranging from smart transmission and distribution to renewable energy systems, all designed to address the global challenges of decarbonization.

### **About CHINT Electric**

Established in 1984, CHINT stands at the forefront of the electrical equipment and renewable energy sectors as a premier manufacturer of low-, medium-, and high-voltage solutions. With over 40 years of experience in the industry, our global workforce of over 50,000 dedicated professionals serves more than 140 countries. Our commitment to intelligent solutions caters to the evolving needs of the energy market, reinforcing our position as an industry leader. In 2023, our annual revenue surpassed an impressive 22.1 billion USD, reflecting our rapid growth trajectory.
